

BRONCHITIS

EMPHYSEMA

BRONCHITIS	EMPHYSEMA
Excessive mucus	Minimal mucus
Major S/S: chronic productive cough > 3 months, SOB, cyanosis, V/Q mismatch	Major S/S: SOB, hyperventilation, weight loss, barrel chest, flattened diaphragm
Major cause: inflammation of bronchioles	Major cause: damage to alveolar sac (due to lost elasticity and subsequent air trapping)
BLUE BLOATER	PINK PUFFER
Alveolar-capillary bed <u>not</u> damaged	Capillary bed is damaged
